

Your joy is in our journey

AQUA Pacific[®] Natural Mineral Water begins its journey as precipitation in the remote mountains and hillsides of Nausori Highlands. Over several centuries this natural water seeps through miles of prehistoric volcanic filters eventually accumulating in an underground “aquifer” or underground reservoir. On occasion an aquifer feeds an “artesian” well that is literally and completely enclosed and pressurized. Water that feeds this type of artesian well reaches its resting spot only by seeping in through small crevices and channels. This is the type of water source that accurately describes what the world now knows as AQUA Pacific Natural Mineral Water, as pure today as nature has preserved for the ages.

Typical Analysis in mg/litre

Calcium	33	pH	7.5
Magnesium	16	Bicarbonate	160
Silica	61	Total Dissolved Solids	250

Its Pure Paradise

Balanced by Nature

Nestled in the majestic islands of the South Pacific, the last bastion of tropical paradise, resides one of nature's truly pure water sources. AQUA Pacific Natural Mineral Water is organically filtered and mineral enriched after passing for centuries through miles of prehistoric volcanic filters. AQUA Pacific will provide you with the perfect balance of life giving minerals captured in the smoothest, most refreshing and unique water available today.

One look at the surroundings of the magnificent source of nature's finest mineral water and it would be easy to draw another conclusion about this truly heaven inspired water. Not coincidentally, AQUA Pacific provides the perfect pH level for our sustained growth and development. Its highly favorable pH helps to re-alkalinize the human body providing many other excellent health benefits.

When you pick up a bottle of the greatest "feel good" bottled water in the world, you can always rest assured that you are also receiving mineral rich content with the life giving properties that will always make AQUA Pacific Natural Mineral Water the ultimate hydrating choice.

Water is just water... or is it?

At the dawn of time water was just water... but now things have changed. Water has become a scarce and valuable resource and far more contaminated than ever before. The educated and eco conscious consumer is increasingly opting for water that not only offers purity in source, delivery and taste but also offers nature's life giving minerals and nutrients.

So how does one decide what is the right choice for them? For water aficionados or for those who simply seek the finest beverage choice for health and taste one mineral water stands alone as the true choice for discerning consumers. AQUA Pacific is rich in TDS (Total Dissolved Solids), Calcium, Chloride, Magnesium, Silica and other valuable minerals that help to fuel our body's metabolic process.

Protected Purity

The purity of AQUA Pacific Natural Mineral Water is guaranteed by a number of factors. Its artesian underground source is naturally protected at the deepest levels with volcanic rock strata. Additionally, our water is constantly tested for the detection of even the smallest changes in the composition. We monitor the alkalinity as well as all the microbiological and other characteristics. Our water is pure from source so the only filtration it under goes is Micron Polishing filters, UV & infusion of Oxygen to ensure the soft and smooth taste. Finally, the water is put through a living water process to ensure that the water you receive remains as pure as it has for thousands of years.

Don't just take our word for it

AQUA Pacific is a multiple Award Winner of the prestigious iTQi, International Taste and Quality Institute, with a membership comprised of 9 prestigious European organizations of Chefs, Sommeliers and Beverage Experts. The iTQi rigorous standard of criteria and evaluation offers our consumers even greater assurance of AQUA Pacific's health benefits, consistent quality and of course, great taste.
